Aloha Surfers!

With the Rameder Board Shuttle there's nothing in the way of your surfing experience

Rameder has the right product for fans of wind and wave surfing. The roof system [Board Shuttle](#) holds up to two surfboards with a width of 70 to 86 cm and protects the boards perfectly, thanks to the soft and weatherproof padding. The ingenious product is available for € 159 on www.rameder.eu and is compatible with common roof racks.

Summer temperatures and water sports simply belong together. Especially popular is surfing, which no longer occurs only on the north coast of the Hawaiian island O'ahu, but is operated on almost all suitable waters. Since the 1950s, even local regions offer numerous opportunities for surfing. But those who do not live directly on the beach or who cannot quickly resort to rental equipment must be able to transport their own boards safely by car. **Rameder** has the special carrier Board Shuttle available for roof mounting.

The high-quality model is characterised by its user-friendly operation and easy installation. With it, two boards with a width of 70 to 86 cm can be easily transported to their destination. Friends of surfing receive the practical [surfboard holder](#) from **Rameder**, Europe's market leader for tow bars and transport accessories, for just € 159.

Rameder offers a suitable basic carrier for almost every car model. After selecting the vehicle, the appropriate products are automatically displayed. The shop available at www.rameder.eu also provides many more useful automotive products. From the practical towbars to bicycle, ski and universal roof racks, roof boxes or car and workshop accessories.
